

About Us

In 1988, Professional Cleaning Systems, Inc. was started in Hillsboro, Kansas in a small car garage. The following year Professional Cleaning Systems, Inc. moved to Lehigh, Kansas into a large machine shed (our fathers). This provided low overhead and lots of room for growth. Our # 1 goal has always been to supply the best customer service available and help our customers with all of their cleaning needs. In 2007 a second location was opened in Dodge City, Kansas, giving us the opportunity to supply quality products and service in southwest Kansas.

Professional Cleaning Systems have offered quality equipment, products and service for 21 years. Not only do we offer the highest rated equipment and products in the industry, but we also offer top-rated customer service and technical support. We have established a leadership standard in sales, services, and outside service technicians who are factory trained. We employ a full-service staff to meet your needs and an extensive array of Accessories, Parts, and Industrial Cleaning supplies for all your cleaning needs.

Our consultants are devoted to helping our customers match the best equipment to customers' needs. We offer on-site presentations to ensure the perfect solution for your business needs and requirements. We also provide installation and training to ensure health and safety for your employees.
